

SWIVEL CLAMP

Enabling a strong quick-set connection for scaffold tubing to the Speed Post and High Post

The Swivel Clamp is designed to easily install on both the Speed Post and High Post and allow a fast and secure connection to industry-standard scaffold tubing.

FAST. SIMPLE. SAFE.

The Swivel Clamp connects securely the Speed Post to a typical scaffold tube with 360 degrees of rotation.

This allows the integration of scaffold tube rails, as well as adaptability for managing slopes and stair wells.
